## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 09/11/03 has been entered.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 3 and 9-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fletcher et al. (4823952). With respect to claims 3, 9, and 11-14, Fletcher et al. teaches a device (66, 110) comprising a device body (30) including a first (32, 102) and second (34, 102) casing housing a printed circuit board (42, 48, 50, 52, 54) with electronic part provided thereon; and an elastic member (56, 58, 60) positioned between the printed circuit board (42, 48, 50, 52, 54) and the first (32, 102) and second (34, 102) casings as claimed (see for example column 3 line 37 through column 5 line 52). However, is silent on the type of device. It would have been obvious to one of ordinary skill in the art at the time the invention was made for the device of Fletcher et al. to be a portable information radio terminal device, in that Fletcher et al. discloses a device (hand held unit 66) with a transparent area for a display, a joy stick, and a keyboard; and a device (unit 110) with a front panel (112) carrying a keyboard, a key switch, and two

displays, all of which are well known elements in a portable information radio terminal device (see for example figures 11 and 12). With respect to claim 10, Fletcher et al. teaches the method steps of claim 9 (see above), however Fletcher et al. lacks a teaching of the method step of pressurizing the elastic member (56, 58, 60) upon assembling the first (32, 102) and second (34, 102) casings as claimed. It would have been obvious to one of ordinary skill in the art at the time the invention was made for the elastic member (56, 58, 60) of Fletcher et al. to be pressurized upon assembling the first (32, 102) and second (34, 102) casings in that Fletcher et al. teaches the casings being secured one to another by screws, which would apply pressure upon the elastic member (56, 58, 60) upon assembly (see for example figure 2).

#### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Please note the devices of Galvin (4053943) and Whitcher et al. (6381124).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lisa Lea-Edmonds whose telephone number is 703-305-0265. The examiner can normally be reached on Monday - Friday.
